

d_skin™ Protective Disc Skins

Protect the **data side** of discs from scratches, dirt and abrasion. Optically clear discs are readable right through the film without altering performance. Snap onto the readable side (bottom) of a standard size disc. Special Liplock™ Seal holds tight and stays on. If d_skin gets scratched, simply remove and snap on another. Use on CDs, DVDs, PS/PS2, Xbox, computer games and CD-Rs. 50/pkg.

CD/DVD Scratch repair system (see A) : incl quality repair solution, DiscGrip platform, Fastwipes for 100 cleaning
